

▲ ZJ200

Roller

- Made in 100% stainless steel.
- Easily take out the roller to clean every time.
- Sugarcane crushed in a single pass ends with up to 60% extraction yield.

Gearshift Motor

- Motor speed is variable according to the diameter of the sugarcane stalk. The bigger the diameter, the lower the speed for maximum extraction yield.
- 1/2HP, 400watt, Single phase.
- The roller is able to move forward and backward.

Sugarcane Entrance

- Accommodates sugarcane stalk diameter up to 2-1/4".

Chiller System

- Crushed juice is fine filtered and quickly chilled.
- It can keep the juice cooling from 5 C to 8 C .

Cleaning Tap

- Provides convenience for daily cleaning of the cooler and the connect tube.

Freezer size: 140x337x598mm
